

Saher Hajidamji

(310) 974-2833 | saherd@berkeley.edu | LinkedIn: Saher Damji

EDUCATION

University of California Berkeley

Class of 2025

B.A. Applied Mathematics, Data Science

OBJECTIVE

Product-minded problem solver with a strong foundation in data science, machine learning, and human-centered design. Experienced in driving end-to-end product development, especially for data-powered user experiences.

SKILLS

Languages: Python, Pandas, SciPy, Keras, SQL, HTML/CSS, JavaScript, R, LaTeX, Mathematica, MATLAB, SQL

Tools: Azure, AWS, Scrum, Salesforce, MySQL, Databricks, Snowflake, Trello, Confluence, Power BI, Jira, Tableau

Skills: Growth Mindset, ML & AI, LLM, Curious, PRD, Problem Solving in Ambiguity, Empathy, Adaptable, Data Visualization, Product Roadmap, Ownership, Bias for Action, Positive, First-Principles Thinking, Ethics, User Research, Experiment Design, Market Research, Competitive Benchmarking, Critical & Systems Thinking, Human-in-the-Loop

WORK & LEADERSHIP EXPERIENCE

Dolby Laboratories

May 2025 - Present

Digital Platforms Product Manager Intern

San Francisco, CA

- Built a Power BI dashboard using Google Analytics and Python to visualize product usage, detect user patterns, and deliver actionable insights for sales enablement
- Managed a centralized hub of marketing assets and leveraged Salesforce data to optimize outreach, maintain stakeholder relationships, and support strategic distribution

WSP

May 2024 - Aug 2024

Project Management Intern

San Francisco, CA

- Crafted Python multiple linear regression model from large dataset to predict 2025 customer service call volume with calculated errors then translated finding into actionable insights for stakeholder communication
- Developed and optimized a deep learning model using neural networks to predict network performance trends, leveraging PyTorch and TensorFlow for real-time anomaly detection and system efficiency

Beats by Dre

May 2024 - June 2024

Branding Strategy & Business Analytics Externship

Remote

- Conducted targeted outreach and user interviews with Gen Z audio device users via social media and networking; analyzed qualitative data to inform strategic marketing campaigns, product customization, and pitch development

Compiify

May 2023 - Aug 2023

Associate Product Manager Intern

Berkeley, CA

- Created and executed A/B Testing on CRM marketing campaigns resulting in a 55% higher customer conversion rate and overall increased customer acquisition by 250%
- Conducted meetings with potential customers for insights on our data compensation product and utilized Jira to translate their feedback into actionable development tasks for the engineering team, ensuring an iterative cycle of data enhancement and optimization

PROJECTS

Math & Philosophy Blog | *Medium*

Jan 2025

- * Authored weekly articles delving into the intersection of philosophy and mathematics, offering insightful perspectives on understanding the world

Michelin Star Blog & Data Analysis | *Excel, R*

Nov 2024

- * Analyzed Michelin-starred restaurant data using R to create custom categorizations, cluster analyses, dendrograms, and geospatial maps, showcasing insights through a coded blog

Spotify Feature Wireframe | *Adobe Premiere Pro & Figma*

July 2024

- * Developed and prototyped an innovative feature mockup that drove user engagement and showcased product value through strategic TikTok marketing

Spam or Ham Classifier | *Python, Pandas, Scikit-learn, Machine Learning*

Mar 2024

- * Developed and evaluated multiple machine learning models for email classification, optimizing error rates using precision, recall, and F1 scores
